Professional Summary

Software developer with 3 years of experience in front-end and back-end development, specialized in JavaScript. Experienced working with different projects and tech stacks, adept at collaborating with the team, committed to delivering high-quality results, reliable and accountable for my work, and able to manage expectations.

Work Experience

Triprr Tech Inc.

Software Engineer

Remote | 09/2024 - Present

- Developed and maintained a web application using NextJS as a full-stack web application, Prisma, and Supabase
- Spearheaded the migration of the web application from JavaScript to TypeScript
- Improved the web application's mobile responsiveness, which improves user retention by up to 100%
- Optimized chat feature performance, reducing message sending, receiving, and data loading times from seconds to milliseconds, which improves user experience and user retention
- Improved the error handling and error display in the web application, resulting in clearer user feedback and improving user experience
- Developed a new content management feature, leading frontend implementation from concept to deployment
- Developed custom notion-like block editor component using TipTap library, enabling flexible content creation and cross-platform display compatibility
- Provided mentorship and guidance to OJT's, fostering a collaborative and productive environment within the team
- Collaborated with the team to develop and improve the web application
- Wrote technical documentation for the web application
- Fixed and resolved critical issues asap in production

Lanex Corporation

Software Development Engineer Level 1

Remote | 01/2023 - 08/2024

- Primarily collaborated with our Japanese counterparts on various projects. Specifically, I worked on three client projects in Japan and one internal project
- Created and maintained visually appealing and user-friendly web interfaces
- Collaborated with designers to implement intuitive and engaging user experiences
- Developed server-side logic and database queries using C#, JavaScript, and PHP
- Designed database, optimized web applications, and fixed bugs
- Created and maintained code documentation, API, and development processes

Software Development Engineer Intern

Remote | 08/2022 - 12/2022

- Actively participated in the entire process of our internal project.
- Received comprehensive training in soft and technical skills
- Proposed Features, Design Low and High-Fidelity Designs
- Designed and developed front-end
- Consistently part of the overall planning, designing, and development of the project
- Reviewed the merge request from co-interns

Education

Bachelor of Science in Information Systems, University of San Carlos - Talamban Campus, Cebu City
August 2018 - May 2023

Senior High School (STEM Strand), University of Cebu - Banilad Campus, Cebu City
August 2016 - March 2018

Skills

- Programming Language (JavaScript, C#, PHP)
- HTML, CSS, SASS, TailwindCSS, Bootstrap
- Frontend Frameworks (ReactJS, NextJS, jQuery)
- Design Systems (Ant Design, MaterialUI, ChakraUI)
- Backend Frameworks (ExpressJS, NextJS, NestJS, .NET, Laravel)
- Database (PostgreSQL, MySQL)
- Tools (Github, GitLab, Jira, Figma, LucidChart, Slack)

Certificates & Awards

Certificate of Participation and Recognition, Davao City

November 2022

Attended and presented our paper entitled "Memores: A Web-Based Intelligent Screening Tool for Predicting Social Anxiety Disorder using a Machine Learning Model" for the conference ICITE 2022 at Mapúa Malayan Colleges Mindanao.

Best Presenter Award, Davao City

November 2022

Our team won the best presenter award for presenting our paper, "Memores: A Web-Based Intelligent Screening Tool for Predicting Social Anxiety Disorder using a Machine Learning Model," at ICITE 2022 at Mapúa Malayan Colleges Mindanao.
